Moments to share

Spring/Summer 2026

Welcome to a new season with Sagaform.
A collection for life on the go, but also to pause,
breathe in, and share what truly matters.

As we open the doors to a new spring and summer,
we are met by moments filled with movement. We
pack the picnic basket, fill our cooler bags with the
flavours of the season, and let the summer light
guide us along forest paths, beaches and jetties.
This season centres around the moments that arise
when we are on the move, between sea and garden,
festive gatherings and the warmth of everyday life.

Sagaform novelties

As we open the doors to a new spring and summer, we are met by moments filled with movement. We pack the picnic basket, fill our cooler bags with the flavours of the season, and let the summer light guide us along forest paths, beaches and jetties. This season centres around the moments that arise when we are on the move, between sea and garden, festive gatherings and the warmth of everyday life.

With new shades of pastel blue, bright yellow and soft, nature-inspired tones, we have created a collection that feels both playful and timeless. A colour palette that captures the scent of freshly cut grass, the feeling of salt on sun-kissed skin, and the sound of laughter in the summer breeze.

We welcome our beloved Billi series in a new, luxurious brown colour shade. Just as natural on the beach blanket as at the Midsummer lunch table. At the same time, we introduce new favourites in our to-go concept, where every thermal mug,

bottle and bag is designed to follow wherever life takes you and to last in both style and function. Our material choices, stoneware, rPET, recycled steel and recycled cotton / recycled polyester reflect our continued commitment to sustainable choices. We know that every little detail matters, and the products we bring with us into summer also tell a story about the future we want to shape.

As the sun climbs higher and the days grow longer, the calendar fills with occasions to gather. The first Easter fika in the garden, Midsummer tables dressed in flowers, and late evenings by the lake. Moments where we meet and share the little things and the big. It's for these occasions we create our products to be there when you lay the table, wrap a thoughtful gift, or simply enjoy a cup of coffee in the first warm rays of spring.

Welcome to SS2026 with Sagaform. A collection for life on the go, but also to pause, breathe in, and share what truly matters.

Sustainability for the future

It should be easy to make good choices, which is a key part of the development of our sustainability work. At Sagaform AB, we put great emphasis on sustainability in our processes and take responsibility for how our operations affect people and the environment. Of course, we hope that you are satisfied with your purchased products but also with us as a company.

As part of the New Wave Group, we pursue active sustainability work towards a vision of sustainable growth where business solutions are not only financially favorable but also sustainable from a social and environmental perspective. What makes the biggest difference is how we conduct our everyday business. That is why we are working to integrate sustainability issues into our core business. The work includes, for example, improved working conditions in production countries, progressive chemical work, and streamlining transport and logistics.

Our common main goal with the sustainability work is to create products with the longest life possible, to minimize the product's negative impact on people and the environment during its life cycle. In our work, we take into account all three dimensions of sustainability -social, environmental, and economic.

One of our strengths is that we have our own CSR staff in place in the production countries who work full time on these issues. The work includes, for example, improved working conditions, progressive chemical work, and streamlining transport and logistics. Through internal controls in combination with independent reviews, we make sure that our products are produced under good social conditions and do not contain any harmful chemicals.

You can read more about how we work with CSR and sustainability on the parent company's website www.nwg.se. There we have gathered all information about important activities, collaborations, and goals for the future.

Give away a Swedish Original

At Sagaform we care about relationships. That is why we always regard our design as a great gift to someone we love but also for ourselves. The gift should be easy to give away with the purpose to raise many smiles on the receivers' faces.

Classic Scandinavian design in combination with carefully chosen details radiating stylish simplicity characterizes what we call Swedish Originals. Functional quality products caring about the familiar and which are created to be used and appreciated in many homes by many families for a long time to come. All of them packaged in a way which is appreciated and received just as they are.

Studio Sagaform

In our studio ideas are brought to life and dreams are shaped. Here we sketch on possibilities, design future originals and bring forth products which always find their way home. We are really proud of our inhouse studio where we combine experience with engagement and loyalty to Swedish design.

Designers

We also work with Sweden's leading designers, with whom we create familiar, well-made products and gifts with Scandinavian design, always ready to be given away. Together with names like Daniel Enoksson, Margot Barolo, Anton Björsing and Pascal Charmolu along with many others we are proud of our heritage. Always with a focus on Swedish Originals.

Decoration

To us decoration should be classic, have a great function and always be appreciated to receive or give away. Here you will find products which both take up space and harmonize with the Scandinavian design.

With great attention to detail, form, and proportion, Daniel has created a product that is not only functional but also part of something greater – a feeling, an experience, a piece of nature in your home. Crafted from certified beech with a high-quality ceramic grinder, built to last over time. The grind size is adjustable to suit your taste and needs. Anton Björsing

Anton Björsing has his background from the distinguished Carl Malmsten School in Stockholm where he studied furniture design focusing on wood. Before that he explored design and wooden handicraft at the Steneby School. The austere Scandinavian design language runs like a thread through Anton Björsing's work. He works mostly with oak in combination with stoneware and glass, which gives the products a further dimension of exciting material contrasts.

Margot Barolo

Designer Margot Barolo was educated at Beckmans and also has a master's degree in ceramics from Konstfack. She has for a long time successfully worked with the Swedish art industry and during recent years also started challenging the picture of the production around this. Margot Barolo's unique design language and her love of ceramics shows in Coffee & More, the dinner service designed for Sagaform.

Included in the series are stackable bowls, coffee cups, latte mugs and plates with inspiration from the 70's and its passion for ceramics with straight lines broken off by a multitude of patterns and playfulness. Her design language is tied together in peaceful nuances, high-gloss glazing and ornamented throughout in relief.

What is rPET?

rPET stands for "Recycled Polyethylene Terephthalate". rPET is a type of thermoplastic polymer used to manufacture many common products, such as plastic bottles for beverages and food packaging. rPET is simply recycled PET plastic. It is produced by recycling used PET products from the consumer stream, primarily plastic bottles. The process involves collecting plastic bottles, crushing them, and melting them down to create new plastic material. The recycled material can then be used to manufacture a variety of products, including bottles, packaging, textiles, and other plastic products. In this case, Billi.
